- _____ DEEP HYPERPIGMENTATION (SUN OR BROWN SPOTS)
- _____ SEVERE PHOTOAGING
- _____ ROSACEA
- _____ DEHYDRATION
- _____ ACNE SCARS
- _____ UNBALANCED

PRECAUTIONS (Please read carefully)

The treatment you will receive is a clinical treatment designed to exfoliate or remove the outer layers of the skin.
Your participation in your skincare treatments will determine the outcome. It is important that you strictly adhere to your home care products that your aesthetician has recommended.
No guarantee is expressed or implied as to the precise results, peeling times or discomfort.
During the treatment, you may experience some temporary stinging or warm flushing. This will fade within a few minutes. During the next few hours, you may experience some tightening of the skin, which may last for several days.
For most patients, flaking begins within 48 hours. It is impossible to pre-determine how much peeling will occur. The shedding process usually subsides within 5-7 days.
Depending on the clinical peel performed and your skin quality, the following reactions may occur in some patients:
 1) Prolonged redness, irritation and flakiness 2) Dryness and sensitivity 3) Severe allergic reactions in rare instances

I PEEL PRE/POST PEEL GUIDELINES

ONE WEEK BEFORE THE PEEL	<ol style="list-style-type: none">1) Discontinue any topical prescriptions or any products containing Retinol or Vitamin A2) Avoid waxing, electrolysis, depilatory creams, and laser hair removal treatments3) Avoid sun exposure (indoor and outdoor)4) Do not receive Botox or dermal fillers5) Do not have another treatment unless recommended
THE DAY OF YOUR PEEL	<ol style="list-style-type: none">1) Discontinue all use of alpha hydroxy acid (AHA), beta hydroxy acid (BHA) and benzoyl peroxide2) Stop any exfoliating products that may be drying or irritating3) Men - do not shave the day of your peel
IMMEDIATELY POST PEEL	After receiving your peel do not use any skincare products that have not been approved by your licensed aesthetician or physician. Your treatment was finished with IMAGE products that are safe to be left on your skin for the evening. You may start your POST TREATMENT KIT the next morning or the I RESCUE post treatment balm as recommended by your practitioner.
DAYS 1-7 AFTER YOUR PEEL	<p>MORNINGS</p> <ol style="list-style-type: none">1) Cleanse your face with ORMEDIC® balancing facial cleanser, using warm water2) Apply ILUMA™ intense lightening serum all over the face to calm and lighten post treatment skin3) Protect skin with PREVENTION + ultimate protection moisturizer SPF 50, reapply as needed <p>EVENINGS</p> <ol style="list-style-type: none">1) Cleanse your face with ORMEDIC® balancing facial cleanser, using warm water2) Apply the MAX™ stem cell crème all over the face for optimal correction, protection and nutrition while the skin is at rest

* **VITAL C hydrating enzyme masque** may be applied 2-3 times during the week to reduce any visible shedding/flaking, while infusing the skin with antioxidants to protect and hydrate.

I PEEL PRE/POST PEEL GUIDELINES

IT IS CRUCIAL TO THE HEALTH OF YOUR SKIN AND THE SUCCESS OF YOUR PEEL THAT THESE GUIDELINES BE FOLLOWED FOR THE NEXT 5-7 DAYS:

- 1)** Do not do anything that will cause your body to become heated or to perspire. This may lead to inflammation and/or breakout (*Exercise, sauna, hot tubs, etc.*)
- 2)** Always use warm water on your face and do not scrub. Avoid chlorine.
- 3)** You may or may not experience some visual flaking or shedding of the skin approximately 2-4 days post peel. The amount of visual flaking is not indicative of your end results. If heavier shedding is present, do not under any circumstances, pick or manually peel the skin.
- 4)** You must take precautions to avoid sun exposure in order to protect your skin as well as to get the full benefit of the peel. Peels increase your skin's sensitivity to the sun and particularly the possibility of sunburn. Exposure to UV rays can cause hyper-pigmentation, freckling and sun damage. We recommend that you stay indoors as much as possible and a use **PREVENTION + ultimate protection moisturizer SPF 50** daily.
- 5)** We suggest if you choose to apply makeup after your peel you use **IMAGE I Conceal flawless foundation SPF 30**. The ingredients in this foundation are safe post peel and encourage healing with the benefits of additional sun protection.
- 6)** Do not use any glycolic, retinol, or Retinol-A for 5-7 days or until your skin is back to normal. This is the reason you are supplied the **POST TREATMENT KIT** providing the proper at home care post peel. You can resume your regular at home IMAGE regimen after the 5-7 days. This time may vary depending on the peel performed and each individual's healing process.
- 7)** For men, do not shave for at least 48 hours after peel.

TO AVOID INJURY TO THE SKIN, FOR THE 10 DAYS FOLLOWING THE PEEL, PLEASE DO NOT:

- peel, pick, scrape or abrade the skin
- have an electrolysis or laser treatment
- use tanning beds or sunbathe
- perform certain hair services using chemicals
- facial wax, thread or use depilatory products
- receive aesthetic injections
- have another treatment until your aesthetician advises you to do so

SLIGHT REDNESS OR SWELLING MIGHT OCCUR IMMEDIATELY AFTER THE PEEL. THIS USUALLY GOES AWAY WITHIN 24 HOURS. SOME CLIENTS EXPERIENCE TEMPORARY SKIN DISCOLORATION. YOU MAY HAVE AN AREA OF SCABBING OR CRUSTING IN CASES OF SEVERE SENSITIVITY, THIS IS VERY RARE. IF IT IS BOTHERSOME YOU MAY APPLY AQUAFOR (FOUND AT YOUR LOCAL DRUGSTORE) TO THE AFFECTED AREA. CALL YOUR AESTHETICIAN IMMEDIATELY IF ANY OF THESE CONDITIONS DO NOT RESOLVE WITHIN 24 HOURS.

For best results, a series of 6-8 peels at 2-4 week intervals is suggested. Using the correct at home care regimen to keep the results and corrections on going is also suggested. Your aesthetician will help you decide which program works best for you, as they vary based on skin conditions.
